Using the SprintScan 35 Scanner in the ITC

SCANNING A SLIDE

1. Place the slide in the scanner upside down.
2. Open the Programs folders.
3. Open the **Adobe Photoshop 4.0** application.
4. Choose the **File** menu.
5. Select **Import**.
6. Select **SprintScan 35**.
7. Select the **Film** box and choose the film type of your slide. (Note: choose **Color Slide** if you are unsure.)
8. Select the **Type** box and choose **Color** for color film and **Grayscale** for B/W film.
9. Select the **View** box and choose the appropriate viewing mode.
10. (Optional) Change the width and height to the desired output size.
11. Click the **Preview** button to view the image.
12. If needed, reselect the portion of the image that you want finalized.
13. Click the **Scan** button to display the image in the Photoshop window.
14. (Optional) Edit the image in Photoshop.

SCANNING A NEGATIVE

1. Place the negative in the plastic negative holder, then insert it into the side of the SprintScan 35.
2. Open the **Adobe Photoshop 4.0** application.
3. Choose the **File** menu.
4. Select **Import**.
5. Select **SprintScan 35**.
15. Select the **Film** box and choose **Color Negative** or **B&W Negative**.
16. Select the **Type** box and choose **Color** or **Grayscale**.
17. Select the **View** box and choose the appropriate viewing mode.
18. (Optional) Change the width and height to the desired output size.
19. Click the **Preview** button to view the image.
6. If needed, reselect the portion of the image that you want finalized.
7. Click the **Scan** button to display the image in the Photoshop window.
8. (Optional) Edit the image in Photoshop.
